A.I.Ch.E. Officers and Directors • 1961

Officers elected for year 1961

Healy McKetta Rushton Van Antwerpen

Directors elected to serve through Dec. 31, 1963

McNally Peters Prutton White

CEP's functional
INDEX
and listing of authors

Officers and Directors elected 1961
for year 1962

President	J. J. Healy, Jr.	Votes
Vice-president	J. J. McKetta	8641
Treasurer	J. Henry Rushton	
Secretary	F. J. Van Antwerpen	
Directors		
"W. R. Collings		
D. A. Dahlstrom		
"W. B. Franklin		
K. H. Hachmuth		
"L. C. Kemp, Jr.		
R. J. McNally		
W. K. Menke		
M. S. Peters		
C. F. Prutton		
"R. Voorhees		
R. R. White		
C. R. Wilke		

Directors		
S. W. Churchill	3728	
H. B. Warner	3654	
W. Edmister	3631	
J. W. Clegg	3374	

The total 1962 slate, in addition to the newly elected officers and directors listed, included: R. P. Genereau, W. R. Collings, R. York, R. Katzen, R. Baron, H. G. Donnelly, L. J. Couthurst, J. K. Harvey, and D. O. Myatt.

*Term expires Dec. 31, 1961

SUBJECT INDEX

CHEMICAL ENGINEERING PROGRESS

Volume 57

1961

A

ABSORPTION
liquid-liquid mass transfer, research Nov. 70-72

Thesis Index Jan. 81

Acetaldehyde monoperacetate, safe handling of, in peracetic acid production Dec. 61-65

ACETYLENE
capacities & derivatives of, in Japan Feb. 54-59
contaminant, air plant Apr. 37-40
costs for producing Nov. 35-42
kinetics, pyrolysis of methane, Nov. 54-59
new process using hydrogen dilution Nov. 45-49
production by partial combustion Nov. 56-53
production in West Germany Apr. 79-84

ACID INJECTION
scale prevention, electrodialysis unit Feb. 72-76
scale prevention in sea water evaporators Jan. 58-63

Acrylonitrile, computer process control, N Feb. 106

ADSORBERS
liquid & vapor phase, removing hydrocarbons from air plants, Apr. 37-40
operating practices in air & ammonia plants Apr. 59-61

ADSORPTION
removing hazardous impurities in air plants Apr. 34-40
separation of acetylene Nov. 43-49
studies of sorption of hydrocarbons in liquid oxygen Apr. 41-45

Thesis Index Jan. 81

AIR PLANTS
hydrocarbon analyzer, automatic, Apr. 55-58
safety, report from operators Apr. 37-61
survey of operating practices Apr. 59-61

AIR POLLUTION
government regulations on way, N Feb. 33
joint industry-community problem, N Jan. 17
ten U.S. goals for control, N Feb. 17
Alloys, for extreme conditions Apr. 74-78
Aluminum, U.S.-Australian venture in South Pacific, N Feb. 86

AMERICAN INSTITUTE OF CHEMICAL ENGINEERS
Auditor's Report June 180
Awards
Allan P. Colburn, 1960 Feb. 164
Allan P. Colburn, 1961 Nov. 174
Best paper presentation Feb. 164, July 130
Distinguished Service, So. Texas Jan. 130
Founders, 1961 Nov. 174
Golden Key, 1961 (non-A.I.Ch.E.) May 116
John Fritz Medal Sept. 180
Lammie Medal, ASEE Aug. 105
Professional Progress, in Ch.E., 1961 Oct. 152
Walker, 1960 Jan. 118
Walker, 1961 Oct. 152
Candidates (Membership) Jan. 18-22, Feb. 148-152, Mar. 196-198, Apr. 104-106, May 102-105, June 126-127, July 127-128, Aug. 98-102, Sept. 124-127, 139, Oct. 144-146, Nov. 168-169, Dec. 132-133
Candidates for A.I.Ch.E. offices Aug. 69-71
Committees
Chairmen, 1961 Feb. 182
Chairmen, 1962 Nov. 192
Council on National Membership Apr. 142

 Transport Phenomena...June 6
 Brackish water, see Saline Water Conversion
 BURNERS
 high velocity combustion...July 94-100,
 Aug. 82-84
 partial combustion, acetylene production
 Nov. 50-53
 BUTADIENE
 processing of...Aug. 62-66
 production of, using French IFP process
 Sept. 66-72
 production of, using Houdry's Isoprene
 process...May 35-40
 Butane, use in direct freezing water
 purification process...Jan. 42-46
 Butylene, capacities & derivatives in Japan
 Feb. 54-59

C

CALCIUM CARBIDE
 costs of production for acetylene...Nov. 35-42
 production capacities of Japan...Feb. 54-59
 Calcium carbonate, scale in sea water
 evaporators...Jan. 58-63
 Calcium sulfate, scale in sea water evaporators
 Jan. 58-63

CARBON
 activated, in Wisconsin Process for NO
 June 51-58
 black, growth & estimated output in U.K.
 Feb. 37-42
 impervious, used for processing HF
 Apr. 69-73

CARBON OXIDES
 by partial oxidation...July 68-74
 CO production in West Germany...Apr. 79-84
 pyrolysis of methane...Nov. 54-59
 Casting, fabrication of materials...Apr. 65-68

CATALYSIS
 catalytic filters, air plant safety...Apr. 45-48
 computer control, acrylonitrile, N...Feb. 106
 computer control, cracking unit, N Mar. 118
 computer optimization of nitric oxide
 reactor...June 51-58
 cracking, acetylene production...Nov. 48-49
 cracking of heavy gas oils...Dec. 55-60
 cracking of reduced crudes...Dec. 37-43
 heterogeneous, correlations of...Aug. 38-41
 hydrogenation of petroleum feeds...Dec. 49-54
 metals contamination effect on cracking
 Dec. 66-69
 oxidation of impurities in air plants
 Apr. 37-40

CATALYSTS
 activated carbon, NO reactor...June 51-58
 evaluation, catalytic cracking of reduced
 crudes...Dec. 37-43
 fluidized bed heat transfer...July 35-42
 in French IFP Isoprene process...Sept. 66-72
 manganese dioxide, acetylene removal
 Apr. 37-41
 metals contamination treatment...Dec. 66-69
 operating practices in air & ammonia
 plants...Apr. 59-61
 replacement, dynamic programming,
 S.S...Mar. 84
 replacement economics...Aug. 42-45
 use in isoprene production by
 dehydrogenation...May 35-40
 use in isoprene production from propylene
 May 43-45
 used in urethane foam preparation
 Oct. 35-39, 47

 application of critical path planning &
 scheduling...Nov. 60-65

problems in Western Europe...Feb. 60-64

of systems for handling HF...Apr. 60-73

Subject Index (continued)

Contract, construction and/or engineering in Western Europe, scope of Feb. 60-64

CONTROL

air pollution, **N** Jan. 17
computer, crude oil distillation unit
June 39-43

evaluation of computer systems for petroleum process June 48-50
feed forward vs. feed back Sept. 45-48
of hydrocarbons in air separators Apr. 41-45
mathematics of, computer June 44-47
needs of U.S. industry, **N** Jan. 15
nonlinear Sept. 49-53
optimum, using OPCON Sept. 40-44
of polymerization, rubber plant Sept. 35-39
process, with computers, **N** Mar. 15
role of computers June 63-67

CONTROLLER (See also Computers, Control)
optimizing Sept. 40-44
pneumatic, testing by pulse method

Mar. 69-79

CONVECTION (See also Heat Transfer)
in foamed plastics Oct. 55-59

role of, heterogeneous materials July 53-59
Copper, integrated chemical leaching plant in Philippines, **N** Mar. 23

CORROSION
in boiling water nuclear reactors Mar. 50-53

in cryogenic liquids Apr. 61-64
in electrodeionization of saline water Feb. 72-76

problem in ethylene oxide fractionator
Dec. 70-74

studies, in sea water evaporators Jan. 58-63

test, alloys for extreme conditions

kinetics, acetylene production Nov. 54-59
linearized solution waters, design of
rotating evaporators Jan. 64-70

mixing of fluid in heat exchangers,
frequency response July 48-51
non-linear control for underdamped
systems Sept. 49-53

plant expansion estimating, statistical
study Aug. 51-55
pressure drop, heat exchangers Sept. 59-65
process control using computer June 44-47
statistical approach in nitrogen oxide

reactor design June 51-58
thermosiphon reboiler designs July 48-47
Venture Worth Method Aug. 46-50

Membrane, characteristics for electrodialysis
units Feb. 72-76

MET-X treatment, removing metals from
catalysts Dec. 66-69

Metallurgy, high temperature oxidation
resistant alloys Apr. 74-78

METALS
new alloys for extreme conditions Apr. 74-78
used in handling liquid oxygen &
liquid fluorine Apr. 61-64

METHANE
cracking, new acetylene process Nov. 43-49
kinetics of the pyrolysis to acetylene
Nov. 54-59

liquefied, **N** July 125
Methanol, capacities of, and derivatives, in
Japan Feb. 54-59

MISSILES (see fuels, propellants)
and rockets, technology, S.S. Oct. 68

MIXERS
design specifications for extreme conditions
Apr. 122-125

fluid, design operations for extreme
conditions May 123-124
for urethane foam Oct. 40-46

MIXING
application of pulse testing method for
dynamic analysis of processes Mar. 79
froth mixer for urethanes Oct. 40-46
in heat exchangers July 48-52
of solid propellants May 92-98
specifications, for extreme conditions
May 123-124

Mobile data loggers, aid process investigations
Mar. 64-68

Molybdenum, properties, use in CPI Apr. 74-78
Monosodium glutamate, facility expanded
N Feb. 142

N

NAPHTHALENE

production outlook in France Feb. 48-53
production in West Germany Apr. 79-84

Naphthalenes, heat transfer medium in spray
column, saline water conversion Jan. 52-57

NATIONAL SCIENCE FOUNDATION
investing in scientific programs Aug. 16
R&D costs per engineer Oct. 16-17

National Science Program, necessary planning

Subject Index (continued)

PHENOL
 growth and estimated future output in U. K. Feb. 37-42
 production in West Germany Apr. 79-84
 production outlook in France Feb. 48-53
 Phenolics, market trends in 1960 Feb. 100-102
 Phillips Tangential Reactor process, cost of acetylene Nov. 35-42
 Phthalic anhydride, production in West Germany Apr. 79-84

PHYSICAL PROPERTIES
 phase diagrams, propane-H₂O-hydride Feb. 66-71
 scale prevention in sea water evaporators Jan. 58-63
 solubilities and scale data sea water conversion Jan. 58-63

PILOT PLANTS
 acetylene, I. R. I. process Nov. 43-48
 catalytic cracking of crudes Dec. 37-43
 chlorine production Aug. 94-97
 desphalting of oil stock Dec. 44-48
 evaporation, sea water Jan. 58-63
 evaporator, rotating, sea water Jan. 64-70
 freezing, with hydrocarbons, saline water Jan. 42-46
 hydrate process, saline water Feb. 66-71
 isoprene, IFP process Sept. 66-72
 MET-X purification of catalysts. Dec. 66-69
 optimizing process controller Sept. 40-44
 paper, new lab, N Feb. 94
 pilotless process development June 16-17
 saline water, spray column Jan. 52-57
 saline water, survey Jan. 37-41
 stereospecific rubbers Aug. 62-65
 synthetic rubber, dehydrogenation May 35-40

Piping, design using impervious carbon and graphite for processing HF Apr. 69-73

PLANNING
 application to research May 65-69
 of projects, using CPPS technique Nov. 60-65

PLANTS
 air, safe operation Apr. 37-61
 aluminum, Pacific area Feb. 86
 aluminum reduction, in Venezuela, N Feb. 96
 bleaching unit, N Feb. 154
 construction problems in Europe Feb. 60-64
 copper, in Philippines, N Mar. 23
 design, using Venture Worth Method Aug. 46-50
 ethylene glycol Dec. 70-74
 expansion estimating Aug. 51-56
 investment costs, nomograph June 68-69
 large-scale liquid hydrogen production Oct. 62-67
 location of hazardous plant, peracetic acid Dec. 61-65
 petrochemicals, France Feb. 48-53
 petrochemicals, Great Britain Feb. 37-42
 petrochemicals, Italy Feb. 48-47
 petrochemicals, Japan Feb. 54-59
 petrochemicals, West Germany Apr. 79-84
 polystyrene, Midwest, N Feb. 86
 power, sodium fuel cell Feb. 140
 refinery, computer control of June 39-50
 rubber, using a computer Sept. 35-39
 saline water Jan. 37-41
 thermal diffusion May 69-64
 urethane foam prepolymers Oct. 48-51

Plasma arc spraying, processing high temperature materials Apr. 65-68

PLASTICS (also see specific material)
 growth and estimated future output in U. K. Feb. 37-42
 growth of Italian industry Feb. 43-47
 growth in Japan Feb. 54-59
 growth in West Germany Apr. 79-84
 manufacture in France Feb. 48-53
 market trends in 1960 Feb. 100-102
 polymerization of synthetic, solvent removal May 50-52
 rigid epoxy foams Oct. 52-54
 rigid urethane foam Oct. 35-39

Abbreviation Key
 N—News item
 C.A.—Computer Abstract
 S.S.—Abstract from CEP Symposium Series Volume

thermal conductivity of foamed plastics Oct. 55-59
 urethane Oct. 40-46
 Polarization, controlling scale, electro-dialysis units Feb. 72-76

POLLUTION CONTROL
 air pollution, joint industry-community problem, N Jan. 17
 air pollution, U. S. goals for control, N Jan. 24
 goals towards solving water problems, N Jan. 24
 governmental regulations on the way, N Feb. 33

POLYETHYLENE
 growth and estimated future output in U. K. Feb. 37-42
 market trends in 1960 Feb. 100-102
 production figures for Italy Feb. 43-47
 production in Japan Feb. 54-59
 production outlook in France Feb. 48-53

POLYMERIZATION
 in acetylene production Nov. 54-59
 continuous prepolymer method for urethanes Oct. 48-51
 in making nitroso rubber Apr. 98-100
 of polysulfide for propellant binder June 96-100
 rigid urethane foam Oct. 35-39
 stereospecific rubbers Aug. 62-65
 of synthetic elastomers or plastics solvent removal May 50-52
 synthetic rubber, computer control Sept. 35-39
 urethane Oct. 40-46

Polymerizer, for production of polyethylene resin, N Feb. 146

POLYMERS
 foamed vinyls Nov. 66-69
 liquid polysulfide manufacture of June 96-100

POLYPROPYLENE
 capacity in U. S., N Mar. 92
 developments in Italy Feb. 43-47
 production outlook in France Feb. 48-53

Polypropylene ether glycol, rigid urethane foam Oct. 35-39

Polyvinyl chloride, production figures for Italy Feb. 43-47

POLYSTYRENE
 expansion in Midwest, N Feb. 86
 foamed, thermal conductivity of, Oct. 55-59
 market trends in 1960 Feb. 100-102
 production figures for Italy Feb. 43-47

Potassium perchlorate, manufacture of Dec. 94-97

Power metallurgy, fabrication of materials Apr. 65-67

Prandtl number, influence in fluidized beds July 35-42

Precipitators, dust collectors, cost of various types Mar. 112-114

PRESSURE DROP
 in packed towers Sept. 54-58
 shell side of heat exchanger Sept. 59-65

PROCESS
 control, computers, S.S. Feb. 65
 control, feed forward Sept. 45-48
 control, needs of U. S. industry, N Jan. 15
 control, nonlinear, for underdamped systems Sept. 49-53
 control of rubber plant, computer Sept. 35-39
 control styrene plant Sept. 40-44
 control using optimizing controller Sept. 40-44

dynamics, in education, S.S. Feb. 65
 dynamics, Soviet challenge Jan. 15
 engineering, role of computers June 63-67
 investigation, using mobile data logger Mar. 64-68

PROCESSES
 acetylene, economics Nov. 35-42
 acetylene, I. R. I. process Nov. 43-48
 catalytic cracking Dec. 37-43
 chlorhydrin, ethylene glycol Dec. 70-74
 dewatering, mechanical, of rubber May 53-54
 dimethylhydrazine, unsymmetrical July 87-92
 distillation, saline water conversion Mar. 94
 electrodialysis, saline water conversion Feb. 72-76

evaporation, saline water conversion Jan. 47-51
 Jan. 58-70

French I. F. P. isoprene Sept. 66-72

Goodyear-Scientific Design process, isoprene May 48-45
 high velocity combustion July 94-100
 Aug. 82-84

H-oil process, catalytic, hydrogenation Dec. 49-54

Houdry dehydrogenation process, isoprene May 35-40

hydrate, saline water conversion Feb. 66-71

hydorfluoric acid, materials for handling Apr. 69-73

large-scale liquid hydrogen production Oct. 62-67

for liquid polysulfide polymers June 96-100

for manufacture of perchlorates Nov. 138-143

Dec. 94-97

MET-X, purification of catalyst Dec. 66-69

nitrocellulose as base propellants Sept. 80-87

Oct. 106-112

for nonflammable nitroso rubber Apr. 98-100

peracetic acid Dec. 61-65

for producing foamed vinyls Nov. 66-69

propane deasphalting Dec. 44-48

refrigeration, saline water conversion Jan. 42-46

rigid urethane foam Oct. 35-39

saline water conversion Jan. 37-41

Shell gasification, partial oxidation July 68-74

for solid propellants May 92-97

solvent removal, synthetic rubber May 50-52

Theis Index Jan. 81

urethane foam by frothing Oct. 40-46

urethane foam prepolymers Oct. 48-51

PRODUCTION
 chemical industry faces foreign competitors, N Apr. 24-25

of chemicals in France Feb. 48-53

of chemicals in Japan Feb. 54-59

effects of feed composition on ethylene economics Aug. 57-61

of hydrazine using nuclear reactors Mar. 37-41

improving operation of ethylene oxide unit Dec. 70-74

of organic chemicals in the United Kingdom Feb. 37-42

of organic products in Italy Feb. 43-47

of petrochemicals in West Germany Apr. 79-84

PROFESSIONALISM
 the chemical engineer in management Oct. 86

chemical process industries Oct. 81

employment of professional people Oct. 82

engineering at forefront Aug. 16

"The First 5 Years" Oct. 100

individual and company responsibilities, N Jan. 16

TRANSPORTATION

chemicals in pressure unit, N Feb. 147

hydrogen peroxide Aug. 76-80

novel methods, LNG and LOX, N Mar. 22

TRENDS

anti-pollution drums beating loud and long Feb. 33

breaking down the info retrieval barriers June 35

Ch.E.'s median income is \$11,530, NSPE reports Sept. 31

clampdown coming on recruiting at conventions Oct. 31

engineering profs' income up 14.7% since 1958 Jan. 33

Monsanto pulls back curtain at research dedication Dec. 33

professionals and education in Red China July 31

radioactive wastes being effectively controlled Nov. 29

researching the research dollar Apr. 33

salary increases tapering off EMC reports Mar. 33

Soviet engineers rapidly expanding ranks Aug. 29

venturing forth into Venture Analysis May 31

U

Urea, present and planned capacities in Japan Feb. 54-59

URETHANE FOAMS

basic chemistry of urethane foams.. Oct. 47

continuous processing of foam polymers Oct. 48-51

foamed, thermal conductivity of.. Oct. 55-59

frothing for producing urethane foams Oct. 46-46

rigid urethane foam Oct. 25-39

V

Vacuum melting, fabrication of materials
Apr. 65-68
Vaporizers, discrepancies between design
and operation Jan. 71-80
Varnishes, production figures for Italy
Feb. 48-47

VENTURE ANALYSIS

economic planning for commercialization
of new products Mar. 80-83
technique to aid management in decision
making May 70-73

trends May 31
Venture Worth Method Aug. 46-50
Vinyl plastics, market trends in 1960
Feb. 100-102
Vinyls, trends in formed processing Nov. 66-69
Vulcanization, in making nitroso rubber
Apr. 98-100

W

WASHING
hydrate crystals Feb. 66-71
removing salt from ice crystals Jan. 42-46
WATER (see saline water conversion)

WATER POLLUTION
facing the nation's problem, N Jan. 24
needs for control in the 1960's, N Feb. 16
Wisconsin process, optimum design June 51-58
Wulf process, cost of acetylene Nov. 35-42

X

Xylene, capacities of, and derivatives,
in Japan Feb. 54-59

Z

Zirconium
properties, use in CPI Apr. 74-78
